-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For example, the identification of “creative aspects inherent within each individual to be ownership, work, and judgment,” is indefinite, because the definition of creative aspects within each individual is an indefinite and abstract entity, and the concept of ownership, work, and judgment are also non-concrete entities, undefined tangibly by the claim or specification. By the same logic, “following the logical and natural community building paths of individuals” is also an abstract act, and is not concretely defined, such that it is not embodied by any computer function, as required, for example. The claim components discuss ideas, rather than tangible methods for implementing the invention. Similarly, “making the community directory users interactive,” is also unclear as to how this exactly takes place.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over the AOL's web portal: <http://www.aol.com>.

As per claim 8, AOL teaches identifying a democracy theatre having four interacting community directories of: resident, business/organization, government, and television/culture and placing in a website, said four community directories (where the resident directory is represented by the white pages, the business directory is represented by the yellow pages, a government directory is specifically listed, and a TV guide is also listed in the website); providing directory users with connecting, computing, communicating, and advertising means (where the links offer these capabilities). AOL does not specifically teach the placing of the name of the community on the website, that these directories are placed on one page of the website, and having a second website page with directories. It would have been obvious to one of ordinary skill in the art at the time of the invention to include the name of a community corresponding to the directories, and disposing it in one web page, as it is well known in the art. An example is the locality-specific web pages that AOL uses, where based on a user's locality, a web page is presented with the community's name, and specific community directories, such that this page would be of relevance to the user. There is a multiplicity of web pages for multiple

communities. Further, placing these directories on one web page constitutes a design choice, and it would have been obvious to one of ordinary skill in the art to do this, by motivation of streamlining the web portal.
